

#### **Highlights**

**Population Growth:** Total population in the Rancho Mirage Public Library jurisdiction increased by 5,000 (30%) over the past decade to 22,000, growing three times faster than the state. Most of this growth occurred in the white, non-Hispanic population (3,000) and in the population age 65+ (3,000).

**Diversity:** This jurisdiction is predominantly white, non-Hispanic, although this share declined from 89% to 84% of total over the past ten years. The Hispanic share of total population increased from 8% to 10%.

**Age Structure:** This area is much older than California overall, and the age structure shifted upward slightly over the past decade. Median age increased in both component cities—from 61 to 62 in Rancho Mirage and from 63 to 67 in Indian Wells—compared with the current California median of just 35. People age 65+ account for almost half—47%, of the total population—up from 44% in 2000 and compared with just 11% statewide. Young people make up only 10% of the population, compared with 28% in California overall.

**Households:** As expected in an older population, family households are less common here than statewide, and families with children are especially uncommon here—just 10% of households compared with 33% in California overall. Nonfamily households are prevalent and increasing—householders living alone account for 35% of all households, up from 31% in 2000 and higher than the 23% statewide. Living arrangements of older individuals here differ from the state pattern in several ways: living with a spouse is more common here, 29% compared with 21% statewide, and living with relatives other than a spouse is less common, 36% compared with 46%.

**Education:** Educational attainment is higher here than in the state overall. Just 5% of adults have not completed high school, compared with 20% of adults statewide, and 44% have a Bachelor's degree or higher, compared with 30% in California overall.

**Income:** The median income in Rancho Mirage is \$72,000 and in Indian Wells, \$135,000, compared with \$60,000 statewide. In the combined jurisdiction, 29% of all households report income of more than \$150,000, compared with just 12% statewide.

Note: The Rancho Mirage Public Library jurisdiction includes Rancho Mirage and Indian Wells. Profiles for the individual cities are also available.

This demographic profile is part of a series of library jurisdiction profiles prepared for the California State Library by the Stanford Center on Longevity. The project, "Understanding California's Shifting Demographics," was supported in whole by the U.S. Institute of Museum and Library Services under the provisions of the Library Services and Technology Act, administered in California by the State Librarian. The opinions expressed herein do not necessarily reflect the position or policy of the U.S. Institute of Museum and Library Services or the California State Library, and no official endorsement by the U.S. Institute of Museum and Library Services or the California State Library should be inferred.
